Azure

✓  
Certified

**Artificial Intelligence**

---

Oxford AI

## Professional Summary

25 years of data centric experience at the highest level. Specialised in the financial sector. He excels at designing and delivering secure, scalable data platforms—spanning Azure, AWS, MS Fabric, and advanced data architectures—across regulatory, compliance, and business-critical contexts, combined with hands on python, Ms SQL, ML, LLM and AI expertise.

**"He leads as the gold standard for modern, compliance-driven data architecture in finance. His ability to innovate end-to-end cloud and data solutions—especially leveraging Azure and Microsoft Fabric—are unmatched. With a portfolio spanning global banks and blue-chip clients, he brings depth, reliability, and vision to every project."**
