

Senior Multi-Cloud Data Architect

 Experience Azure Synapse Analytics <hr/> Expert	 Experience Data Architect <hr/> Proven	 Experience Data Governance <hr/> Senior Level
--	---	--

Professional Summary

A seasoned Data Architect with over 19 years in IT, specializing in architecting robust, secure, and cost-effective cloud data solutions. Highly experienced with both Azure and AWS platforms, including Azure Synapse, CosmosDB, and databricks data lakehouses. He is deeply proficient in ETL processes, data modeling, and governance.

"An exceptionally skilled architect capable of driving complex cloud initiatives. A skilled communicator and strategic problem-solver, there is little he has not touched within Azure environments so brings a wealth of expertise to new data centric initiatives and is perfect for complex / multi-faceted data centric Azure initiatives."
